

NEW CarbonParts EC Mount 2

Product Overview

As Velocitek introduced the new Prizm compass this year CarbonParts created a new mount. The CarbonParts EC Mount 2.

The CarbonParts EC Mount 2 is a single piece manufactured 100° carbon elbow, making it stiff enough to withstand any impacts. It fits the dimensions of the Velocitek Prizm, but also the Raymarine T060 Micro Compass. It is designed to be placed underneath the vang. This ensures the best visibility and that no ropes get caught on it.

Like all our products, it is attached to the deck by a 3M Dual Lock Velcro. It comes with everything you need.

With just 35 g of weight, it is as light as possible. The dimensions are 70x76x115 mm (LxHxW).

The recommended retail price is 65.00 € incl. VAT.
